Project 000 | 05/12/2020
(Python GUI)

Goal :

This mini-project's main goal is to let you familiarize with the GUI of python and also the problem solving steps.

Task :

Your task is to create a scientific calculator using python graphical user interface as shown in the example below.

** Please note that you are free to choose the design style you want.
** The project discussion will be in the CODE Projects Facebook group.
